

Looping with Numbers

for loops in Bash can be used in several ways: - iterating between two integers, *a* and *b* - iterating between two integers, *a* and *b*, and incrementing by *c* each time - iterating through the elements of an array, etc.

Use *for* loops to display the natural numbers from **1** to **50**.

Input

There is no input

Output

```
1
2
3
4
5
.
.
.
.
50
```

Recommended Resources

A quick but useful tutorial for Bash newcomers is [here](#).
Handling input is documented and explained quite well on [this page](#).
Different ways in which *for* loops may be used are explained with examples [here](#).
